MEET YOUR NEW GRADING ADVANTAGE

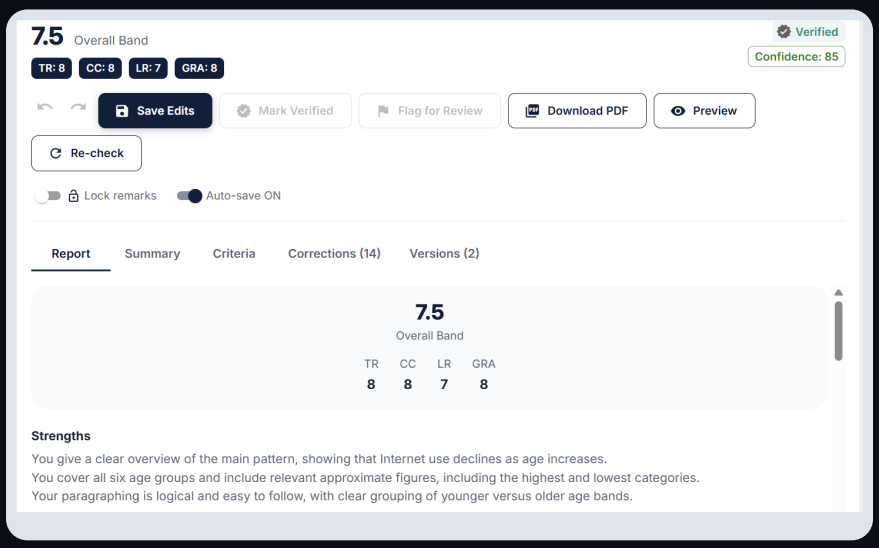
BandPilot AI

More feedback. Less grading overhead.

AI-powered IELTS writing assessment for training centers that want faster turnaround, clearer feedback and a consistent marking standard.

Your standards. Your oversight. AI at work.

Advanced language AI turns writing submissions into rubric-based band estimates, explained corrections and polished PDF reports. Teachers review, refine and verify the output.



ACTUAL APP VIEW / Teacher review & PDF export

01 Calibrate the standard

Align feedback style and grading strictness with your center's agreed marking approach.

02 Keep teachers in control

Edit feedback, re-check results, flag exceptions and verify work before release.

03 Give every score context

See criterion scores, strengths, weaknesses and explained corrections together.

Stop letting marking bottlenecks set your pace.

Inconsistent correction?

Use a shared assessment framework to reduce grader-to-grader variation.

Feedback arriving late?

Move repetitive assessment and report preparation into an AI-assisted workflow.

Quality slips at peak demand?

Keep structured feedback and review controls as submission volumes grow.

Make the grading economics work.

2.5× productivity. 250% of current output. More capacity for your team.

PRODUCTIVITY / COST PER TASK	MANUAL	WITH AI
Tasks per employee / month	**200**	**500**
Productivity vs. baseline	**100%**	**250%**
Labor cost per task	**$20**	**$8**

If you think now is not yet a good time to adopt AI...

Imagine your competitor DOES.

POTENTIAL EFFICIENCY SAVINGS

60%

$12,000 / month

$144,000 / year

Illustrative 1,000-task month: $25/hour × 40 hours/week × 4 weeks/month = $4,000 per employee. At 200 vs. 500 tasks per employee, labor cost per task falls from $20 to $8. Potential value: $12,000/month before software and other costs. Throughput requires trial validation; time released creates capacity, with cash savings dependent on how it is used.

From submission to a clear next step.
